

The Wave Modfountain

We're MODFOUNTAIN because we modify and customize to your needs:

Product Name: The Wave 1 and 2 Modfountains

Product Description: The Wave fountains shown in raw Corten steel. Also available in Stainless steel. The Wave water sculpture includes anchor plate.

A Lightweight fountain, small footprint, water tension flow along the interior curve and low splash radius makes the Wave fountain ideal for creating a soothing sound and visual effect in a smaller exterior or interior courtyard. Perfect for roof top and balconies.

Adjustable water flow and spout location to control splash radius and surface water tension.

All designs and images are exclusive property of MODFOUNTAIN and can not be reproduced without written consent.

The Wave 2
(water spout at top of curve)

The Wave 1
(water spout 2/3 from base)

Fountain Maintenance

Corten steel is designed to rust and requires a period of time before the patina sets.

Corten steel being a permeable material can be coated with a commonly used clear sealer to improve water resistance, extending the life of the sculpture.

All stainless steel Modfountains are finished by electro-polishing which creates “good bright finish” 35 times more resistant to corrosion than hand polishing. See Stainless Steel care instructions on MODFOUNTAIN.com

Pond Maintenance

Avoid using salt based water treatment chemicals as it can accelerate rusting. We recommend EcoSolv liquid pond cleaner.
